**Indeck Energy: Committed to Sustainable Logging**

LADYSMITH, WI – (July 19, 2010) – Indeck Ladysmith, LLC, the owner and operator of the Indeck Ladysmith BioFuel Center in Ladysmith, Wisconsin, produces about 90,000 tons of Premium Grade Wood Pellets each year.

Creating those wood pellets, which are a natural and renewable source for both residential and commercial energy, takes about 200,000 tons of raw hardwood, along with a quality blend of sawmill and forest residuals.

“As the producer of a premium grade wood pellet, we consume a large amount of raw material each year,” said Mike Curci, plant superintendent of the Indeck Ladysmith BioFuel Center. “Our commitment to the environment goes beyond simply producing renewable biofuel. We believe it is our responsibility to create our product in an eco-friendly way.”

Although Wisconsin is home to approximately 16 million acres of forest land, Indeck Ladysmith utilizes the expertise of its partner, Midwest Forest Products Company, to ensure that all of its feedstock is carefully selected and harvested to meet, at a minimum, the strict guidelines set by the Wisconsin Department of Natural Resources.

“As Indeck Ladysmith’s feedstock aggregator, we work exclusively with contractors who meet rigorous, third-party certification standards for ecological, social and economic sustainability,” said Eric Maki, President of Midwest Forest Products Company. “We promote responsible and sustainable forestry practices at every turn.”

Detailed reports of the standards to which both Indeck Ladysmith and Midwest Forest Products Company adhere can be viewed at the Wisconsin Department of Natural Resources’ Web site, <http://dnr.wi.gov/forestry/certification/>.

“It is important that our customers understand that Indeck Energy Premium Wood Pellets are manufactured responsibly,” said Curci. “Choosing to heat your home with wood pellets is a choice for the environment. We want customers to know that Indeck is also supporting the environment through responsible harvesting and sourcing efforts.”

Wisconsin's forests are vibrant and healthy. Each year annual forest growth exceeds harvest levels. Because of careful planning and the cooperation of companies like Midwest Forest Products Company and Indeck Ladysmith, the valuable forest resources of Wisconsin will be available indefinitely.

###

The Indeck Ladysmith BioFuel Center is owned by Indeck Ladysmith, LLC, a subsidiary of Indeck Energy Services, Inc. Indeck Energy Services is a privately held developer, owner and operator of renewable and conventional energy projects. As one of the few remaining privately held independent energy producers, it has grown into a full-service energy company that offers biofuels production and electrical generation facilities. The company was established in 1985 and is headquartered in Buffalo Grove, IL.
